

POSITIVE WITH VACCINE

steps to be

NEGATIVE

WITHOUT VACCINE

- Helps keep you from contracting COVID-19
- Safer way to help build protection
- Protects both yourself, family, friends, Seniors, each other
- Creates antibody response without severe sickness
- Step towards Seniors being able to have visits safely
- Supports TEAMembers who've been heavily impacted
- Helps relieve overburdened health system
- Best defense in combination with other CDC virus protocols:
 - Mask usage
 - Social distance
 - Hand hygiene
 - Avoid large gatherings
- Provides peace-of-mind
- Vaccination is FREE OF CHARGE
- Supports rebound of economy
- Helps small businesses, restaurants and schools
- Play a historic role in slowing the spread and saving lives
- Positive step in changing outcome of pandemic

- Higher risk of contracting and spreading disease to:
 - Family, friends, TEAMembers, Seniors, others
- Prolongs pandemic and getting to a 'new normal'
- Increased worry and fear
- Still much more to learn about impact of disease
- Should you contract COVID-19:
 - Vulnerable to life-threatening complications
 - Increases risk of long-term health problems:
 - Fatigue
 - Shortness of breath
 - Cough
 - Joint pain
 - Chest pain
 - Brain fog
 - Depression
 - Muscle pain
 - Headache
 - Intermittent fever
 - Racing heart/palpitations
 - Serious impact in some cases:
 - Inflammation of heart muscle
 - Decreased lung function
 - Acute kidney injury
 - Memory problems
 - Smell and taste loss
 - Sleep issues
 - Difficulty concentrating
